

Primary Care Research Centre

- What can we do?
- Development and evaluation (clinical trials) of antibiotic stewardship interventions to change practice in primary care (in partnership with CTU):
 - Diagnostics
 - Herbal medicines
 - Behaviour change interventions
- Systematic reviews and meta-analyses
- Qualitative studies
- Patient and Public Involvement
- What do we want?
- Partnerships with teams who have new interventions to aid antibiotic stewardship in primary care
- Partnerships with microbiologists to process samples taken from patients in primary care
